

inpro –
Partnership, commitment and competence for the automotive production of tomorrow!

Who we are

inpro Innovationsgesellschaft für fortgeschrittene Produktionssysteme in der Fahrzeugindustrie mbH is a joint venture of the industrial corporate groups **SABIC**, **Siemens** and **Volkswagen**. At the Berlin location, **inpro** develops innovative software solutions and technologies for automotive production primarily for shareholders.

Looking for a **new job** and want to take on new challenges? Then apply now at **inpro** and support our development team in **Berlin** as a

Software Test Engineer (m/f/d)

Your Tasks

- Definition, execution and documentation of manual and automated test cases
- Creation of test specifications and instructions based on the software requirements
- Conception of test strategies in regular consultation with the software developers
- Review of the test results and derivation of suggestions for improvement for the QS management and the expansion of the CI/CD toolchain

Your Profile

- Degree in computer science, mathematics or comparable education
- Relevant experience in creating manual test cases, test execution and test automation
- Knowledge of scripting languages (e.g. Python) required, experience with high-level languages (C++, C#) advantageous
- Practiced handling of Microsoft operating systems; experience with Linux is an advantage
- Team-oriented and innovative working method
- Fluent in German and English

What we offer

- Interesting, challenging activities, quick decision-making processes in small, dynamic teams
- Participation in dynamic developments in an exciting market environment, insight into current challenges in the automotive industry
- Remuneration in line with market conditions, good professional development opportunities
- An open corporate culture, a modern and agile working environment in a prime Berlin city location
- Flexible working hours and arrangements for good work life balance
